

Parts Warranty

BMW of North America warrants the Original new and remanufactured parts and accessories it sells against defects in materials or workmanship for a **period of 24 months** commencing on the date of sale or installation by an authorized BMW passenger car center or authorized BMW light truck center.

Original BMW accessories that are installed in or on the vehicle such as front and rear spoilers, alarms, sun/wind deflectors and cassette holders will carry the new vehicle warranty if they were installed prior to delivery to the client. If the installation is made after the retail sale of the vehicle, the accessory will be warranted for the balance of the new vehicle warranty period, **or two years from its date of installation, whichever is greater.** If the New Vehicle Warranty is in effect at the time of replacement, the claim should be submitted under the New Vehicle Warranty

All over the counter/center installed parts which fail during the applicable warranty period (see [Original Parts and Accessories](#), WPPM-3) must be verified as defective by a qualified service department employee and documented on a repair order. If the sale/installation is made after the retail sale of the vehicle, the part will be warranted for **the balance of the new vehicle warranty period, or two years from its date of installation, whichever is greater.**

Prior to repair, certain automatic transmissions and electronic component repairs/replacements require PuMA repair process authorization (Teile-Clearing).

If installation in the vehicle is required to determine that a defect exists (or the client simply returns the vehicle in which the defective part was installed), then the **labor to diagnose the failure as well as to repair or replace the failed part is covered for parts sold over the counter and parts installed by an authorized BMW center.**
